Enloe Community Council

By the end of the meeting we will: have a greater idea on what topics to cover in meetings

WHAT	HOW & WHY	NOTES
Welcome and Connections	Settle down and enjoy second chance breakfast and the LoeDown	- Going over survey today

Go Over Survey and Responses	Look at pie charts and bar graphs, share responses and have a group discussion about what topics to cover and if staff would be beneficial at meetings	- School events, student council events, administrative decisions → people wanted to know the most about
		  - Going to talk more about testing
		- Repetition of events on LoeDown or different information?
		  - Need to talk more about things not happening on the LoeDown
		  - Make a homeroom remind
		  - Write things on the board when telling the class so that they can take pictures of it
		- Administrators at meetings
		  - Having a "panel" with administrators and ask teachers specific questions about prepared questions
		    - Ex. Asking questions about portfolios
		  - Some people think it might cancel out student opinions
		- Want to be able to make a change in their HR
		  - Trying to make change by connecting more with homeroom
		  - Try to connect the COMMUNITY council
		  - Feeling like they are messengers instead of actually trying to make change
		  - Want to vote on: what we do in the school, having access to what the admin want us to vote on
		  - School improvement meetings every month → discuss and vote on things to improve the school

SOAR	Admin/School Improvement Team would like us to redesign or approve upon the SOAR posters	- Come up with new definitions for "SOAR" - Write on board and vote in RA, then take back to homeroom and ask them to vote - Write agenda for RA meetings - We want to change and make a version of "SOAR" that we are going to use
What do y'all want to come out of this?	Final comments on how they want meetings to run	-
